EDUCATION

- Texas A&M University** College Station, TX
• *Master of Science in Management Information Systems; GPA: 3.7/4.0* Aug 2023 - May 2025
Coursework: Data Mining, Cloud Computing, Data Warehousing, Advanced Data Management, Machine Learning, Systems Design
- SRM University** Chennai, India
• *Bachelor of Technology in Computer Science and Engineering; GPA: 3.8/4.0* Aug 2016 - May 2020
Coursework: Data Structures, Analysis of Algorithms, Distributed Systems, Operating System, Software Engineering

TECHNICAL SKILLS

- **Languages:** Java, Python, C, C++, C#, JavaScript, SQL, Bash, R, Go, Scala
- **Frameworks/Lib:** React, Flask, Spring Boot, Spark, JUnit, Scikit, Node Js, PyTorch, TensorFlow, Pandas, Numpy
- **Tools & Software:** AWS, Azure, Kubernetes, Hadoop, Git, Jenkins, Docker, Kafka, Linux, Tableau, Power BI
- **Databases:** MySQL, Snowflake, MongoDB, PostgreSQL, Amazon Redshift, S3, Hive, Oracle, NoSQL, RDBMS
- **Certifications:** AWS Certified Solutions Architect, Scrum Master, Salesforce Developer, Java Programming

WORK EXPERIENCE

- Software Developer - Competency Tracker Application, TAMU - TX** Jan 2025 - May 2025
 - Developed a web app over 9 sprints using **React.js**, **AWS Lambda** (Python, Node.js), and DynamoDB, integrated via API Gateway (**RESTful APIs**), enabling 40+ teachers to track competencies of 1,000+ students in real-time
 - Designed a **serverless microservices** architecture with AWS Lambda, SQS, and SNS for decoupling and real-time alerts, leveraging CloudFront for caching, handling 10k+ requests per second while improving reliability
 - Implemented Cognito authentication, IAM with RBAC for access control, and a **CI/CD** pipeline with CloudFormation and Git, leveraging **S3** for secure storage and backups, enhancing security and reducing deployment time by 80%
- Teaching Assistant, Texas A&M University - College Station, TX** Aug 2023 - May 2025
 - **Cloud Computing:** Evaluated assignments on building a fault-tolerant "Ticket Booking" system using AWS Services, enabling clients to reserve tickets for games through a resilient server
 - **Data Structures & Algo:** Hosted labs, explained key concepts, and assisted students in optimizing and debugging code
- Software Engineer II, Tata Consultancy Services - Chennai, India** Apr 2022 - Jul 2023
 - Developed **RESTful APIs** to integrate Salesforce with SAP via MuleSoft, enabling real-time synchronization of orders and product pricing, eliminating manual entry, and increasing system scalability by 60%
 - Enhanced order management by implementing Amendment and Renewal features using **Java** and **LWC (JavaScript, CSS)**, adhering to **SDLC** best practices, which improved contract reusability
 - Led a 5-member team, mentoring developers and enforcing best practices through code reviews, delivering 10+ PoCs and 20+ features using **Java** and **SQL**, improving code quality and expediting development by 50%
 - Integrated Olympus's Sales and Service processes using **Salesforce** and **SAP**, enabling seamless service opt-in during equipment purchases. This reduced order creation steps by 60% and boosted revenue by \$80,000+ per month
- Software Engineer I, Tata Consultancy Services - Chennai, India** Jan 2021 - Apr 2022
 - Ensured smooth project go-lives through **QA**, and **unit testing**, developing over 50 java test classes to debug and resolve critical issues in code, reducing post deployment errors by 95%
 - Automated Order approvals and quote document generation using **flows & triggers**, improving user experience by 90%
 - Received the **Best Customer Service Award** for enhancing user experience by assisting 5,000+ customers and resolving 300+ critical defects in the Quote-to-Order process (Java, SQL), increasing system performance by 60%
 - Created technical **documentation** for objects, classes, and triggers, optimizing application architecture, API integrations and cloud infrastructure. This reduced system load by 90% and enhanced operational efficiency
 - Performed **400+** live deployments using **Git** and **Flosum**, and 200+ master data updates via **Workbench** to maintain version control, ensuring up-to-date production and testing environments for seamless continuous integration

ACADEMIC PROJECTS

- **Image Classification:** Implemented machine learning models (Logistic Regression, Decision Trees, ResNet-18, and CCT) in python for image classification on the CIFAR-10 dataset, achieving a high accuracy of 94.4% with the **CCT model**. Enhanced zero-shot accuracy by 33% using multimodal learning **Tech Used:** Pandas, Numpy, PyTorch (Aug - Dec 2024) [Link]
- **Dominick's Finer Foods:** Designed a **data warehouse** for DFF (100+ stores) using Kimball's methodology, structuring 5 data marts to address 10 business questions. Built an **ETL pipeline** to process **15GB** of raw data, ensuring data integrity. Optimized reporting with SSAS and Tableau, increasing stakeholder satisfaction by 90% through sales and customer insights **Tech Used:** Star Schema, Data Cleaning, SSIS, Power BI, SSMS, SSRS (Aug - Dec 2024) [Link]
- **Point of Sale System:** Developed a POS database in EC2 using MariaDB, optimizing performance with views, indexes, and triggers. Enhanced scalability and availability through replication and **clustering**. Migrated to MongoDB, leveraging **NoSQL** for denormalization, boosting data processing speed by 50% **Tech Used:** Linux, SQL, RDBMS, ETL (Aug - Dec 2023) [Link]

EXTRA CURRICULAR ACTIVITIES

- **Baptist Student Center Church, TX:** Spearheaded the Selfless Service initiative, driving community outreach through donation sorting, meal prep, and events engaging youth and elderly. Fostered community engagement and collaboration
- **Andropedia Club, SRM University:** Partnered with alumni to conduct hands-on workshops on IoT, cloud computing
